Refreshingly clean lines with natural elements

are the perfect backdrop for this transitional home from Majestic Homes that blends comfort and luxury. The first hint of impeccable detail throughout the home is the beautifully hand-crafted medallion welcoming guests.

The gracious interiors make entertaining a pleasure with an open Chef's kitchen with crisp white countertops and warm birch cabinets. The kitchen area leads into the family room complete with a Baby Grand piano, soaring stone fireplace and stunning ceiling heights. The dramatic curved staircase lined with large windows to the second floor sits opposite

the Victorian-inspired turret eating area which adds sophisticated symmetry to the astuteness of the design.

The luxurious master retreat is complemented by intricate stone and tile in the master bath along with his and her walk-in closets leading to the laundry and mud room. Take in a movie in the theater or stroll outside where the outdoor space is spectacular and encourages gatherings with areas for relaxing under the covered patio, on the beach or dining al fresco next to breath-taking views of the lake.
